#### XChart Prefix Screener:

There are six default screening criteria from system where these six criteria could be user modified and user defined prefix criteria;

### XChart Customised My Screener:

User could customised criteria and save the criteria for future repeat screenings. The saved criteria could be set into prefixed stock screeners.

The screened results could be channel into screener favourite list for chart analysis;

#### Details descriptions of all the parameters are available in the Stock Card Online parameter abbreviation clicks.
